STEAM GENERATING PLANT, SASKATOON.

REGINA, January 27, 1947.

HON. J. L. PHELPS,

Minister of Natural Resources,

Saskatchewan Resources Building,

Regina, Saskatchewan.

Dear Sir:

The Saskatchewan Power Commission submits this report for the fiscal year ended December 31, 1946. The attached financial statement carries the certificate of the Auditor of Utilities.

The Commission is pleased to report a remarkable increase in the consumption of electrical energy during 1946. This increase, we believe, is due in large measure to lower rates for electrical service put into effect through general rate reductions made on the following dates.

First Reduction \_\_\_\_\_May 1, 1945 Second Reduction \_\_\_\_\_June 1, 1946

A comparative statement of kilowatt hours consumed and revenue received from the sale of electrical energy is shown below and we particularly call your attention to the increase of approximately sixty percent, in kilowatt hour sales at retail to Saskatchewan Power Commission consumers in 1946 over 1945 and the corresponding increase in electric revenue for the same period of approximately fifty percent. The apparent drop in sales to Dominion Electric Power Limited customers is due to 1945 sales and revenues on Dominion Electric Power Limited properties in British Columbia, Alberta and Manitoba, having been included up to June 25, 1945, the date upon which these properties were sold to Northland Utilities. Exclusion of these revenues from the 1945 accounts of Dominion Electric leaves an amount for 1945 considerably below the 1946 sales and revenues. The increase, however, was not as great as the increase on The Saskatchewan Power Commission system.

### KILOWATT HOURS SOLD-

Wholesale to Cities:	1945	1946
Saskatoon	52,957,068 3,326,900 3,906,637	57,521,743 3,754,800 5,231,928
Retail to: Saskatchewan Power	, ,	
Commission Customers	17,267,635	27,413,754
Power Ltd. Customers	16,135,248	16,904,732
	93,593,488	110,826,957

### REVENUES RECEIVED FROM THE SALE OF KILOWATT HOURS-

	1945	1946
Saskatoon	\$ 610,584.96 149,412.59 120,377.78	\$ 661,730.21 154,774.70 128,892.89
Commission consumers Dominion Electric Power Limited	1,083,238.20 713,675.89	1,526,064.95 670,189.46
Total Sales	\$ 2,677,289.42	\$ 3,141,652,21

The Commission is in the favorable position of being able to report a surplus for the first time in the history of the Commission's operations. The profit, as shown by the Auditor's Statements attached, for the fiscal year 1946, amounted to \$414,282.84. This represents the profit after full interest charges amounting to \$316,058.31, Contingent Reserve of \$63,050.04 and Sinking Fund (Depreciation Reserve) of \$151,320.00.

We are tabulating below loss or surplus for each year of the Commission's operation and the accumulated deficit or surplus.

SURPLUS AND DEFICIT FOR EACH YEAR FROM COMMENCEMENT OF OPERATIONS TO DECEMBER 31st, 1946.

		G 4 6 37	Accumulated	Accumulated
$\mathbf{Y}$ ear	Loss for Year	Surplus for Year	Deficit	Surplus
1929	\$ 180.06		<b>\$</b> 180.06	
1930	946.11		1,126.17	
1931	35,880.11		37,006.28	
1932	50,979.17		87,985.45	
1933	77,497.27		165,482.72	
1934	77,135.10		242,617.82	•
1935	46,980.90		289,598.72	
1936	24,150.55		313,749,27	
1937	12,616.57		326,365.84	
1938	570.20		326,936.04	
1939		<b>\$</b> 7.499.51	319,436,53	
1940		3,386.93	316,049.60	
1941		12,945.08	303,104.52	
1942		16,746.61	286,357,91	
1943	:	22,462.87	263,895.04	
1944		32,477,37	231,417.67	
1945		156,835.15	74,582.52	
1946		414,282.84	•	\$ 339,700.32

The following statement shows the growth in the number of customers and we particularly call your attention to the fact that more new customers were added to our lines through service extensions made during the year 1946 than were added to the lines of the Power Commission in the ten-year period from 1931 to 1941.

Meters in service Saskatchewan Power Commission System (Figures for 1945 and 1946 include meters in service on the system of the Dominion Electric Power Limited, a wholly owned subsidiary).

SASKATCHEWAN POWER COMMISSION CONSTRUCTION OF PLANTS, TRANSMISSION LINES AND DISTRIBUTION SYSTEMS

Construction completed and in progress during the year 1946:

### 1. HALBRITE-MIDALE-MACOUN:

Construction of this extension started in 1945 using principally material salvaged from the Ralph and Chandler Airports. It was completed during the year 1946 and service given to the three Villages of Halbrite, Midale and Macoun and to rural customers where application has been made and it has been possible to secure sufficient material for the extensions.

### 2. QUTRAM-TORQUAY:

The line serving the Outram Airport was purchased from the Dominion Government. A portion of the line was dismantled and this salvaged and together with some new material was utilized in extending service to the Villages of Outram and Torquay. The length of line involved is twenty-seven miles. The line is operating at 22,000 volts and a number of farms located adjacent to the line are receiving service.

#### 3. Webb-Antelope-Gull Lake Line:

Construction was scheduled for 1945, but due to delays in shipment of the necessary material, the line was delayed until 1946. This line was constructed for eventual operation at 33,000 volts to serve as a portion of the trunk line from Swift Current to Maple Creek. The extension which is approximately twenty miles in length is presently being operated at 23,000 volts. Completion of this line permitted the closing down of the Gull Lake power plant, which is now interconnected with the system extending from Carievale through Estevan, Weyburn, Moose Jaw, Assiniboia, Shaunavon, Swift Current, Gull Lake and Leader.

### 4. Assiniboia-Willowbunch:

Construction of the Assiniboia-Willowbunch system was commenced in Construction of the Assimbola-Willowbunch system was commenced in 1945, but due to shortages of material completion was delayed until 1946. The system includes the Villages of Willows, Readlyn, Verwood and Willowbunch. Willowbunch was formerly served by an isolated power plant operation of which has now been discontinued and the plant is being dismantled. Construction of this line, some thirty-seven miles in length, makes this system a part of the general southern system referred to in the previous paragraph.

### 5.\* EXPANSE-ARDILL:

The 33,000 volt line of the National Light & Power Company Limited, constructed to serve the Mossbank Airport during the war, was located approximately one-half mile from Expanse and three and one-half miles from Ardill. The Power Commission purchased equipment serving the Buttress Airport located between Moose Jaw and Expanse, salvaged the material and used the salvaged material to erect transmission line and distribution systems to serve Expanse and Ardill. The transmission line is approximately three and one-half miles in length.

### 6. PILOT BUTTE PUMPING STATION CANADIAN PACIFIC RAILWAY:

This important industrial power load was available approximately one and one-half miles from our transmission line and extension was made and a long term contract for service completed with the Canadian Pacific Railway.

### 7. REGINA RADIO STATIONS:

The Regina Radio Stations:

The Regina Radio Stations CKCK and CKRM decided to raise their broadcasting power from 1,000 watts to 5,000 watts and it became necessary to move the transmitters to a location near the Village of Rowatt. An arrangement was made whereby both stations completed long term contracts with the Commission for the supply of power and in addition, the Radio Stations contributed approximately fifty percent. of the cost of the extension which will be used to supply the two Radio Stations, the Village of Rowatt, the T.C.A. Beam Station, the American Army Beam Station and rural customers along the route. The extension is approximately eight and one-half miles in length and a portion of the line will serve as part of the interconnection between the Power Commission's Estevan-Moose Jaw system on the west and the Regina-Fleming system on the east. This interconnection will be completed as soon as material supplies will permit and this will enable the Commission to utilize Estevan produced energy on both systems and will also serve to cut down service interruptions by affording an alternate source of power. affording an alternate source of power.

### 8. RADIO STATION CFQC:

Radio Station CFQC at Saskatoon raised their transmitting power from 1,000 watts to 5,000 watts and re-located their transmitter station to a point approximately one and one-half miles from Power Commission lines west of Saskatoon. A long term power agreement was completed and the Radio Station paid the cost of that portion of the line designed primarily for the Radio Station's service.

### 9. ESTEVAN-STOUGHTON SYSTEM:

Construction of this line started in 1945, but was delayed due to shortage of material and was not completed until December, 1946. This line is approximately thirty-nine miles in length, was constructed to operate at 66,000 volts (being the first 66,000 volt line in the Province) and will be operated temporarily at 22,000 volts until further extensions of the line

will permit transmission of a greater amount of energy for delivery in the area along the east side of the Province. The delivery of this energy will also be contingent upon completion of power plant additions at Estevan presently in progress. This interconnection completed the system extending from Carievale through Estevan, Weyburn, Moose Jaw, Assiniboia, Shaunavon, Swift Current, Gull Lake and Leader. The Estevan Power Plant is now being utilized to its full capacity in delivering electrical energy into this system and upon completion of power plant extensions presently under way at Estevan a considerably increased amount of electrical energy will be supplied throughout the southern and eastern portions of the Province from the Estevan Power Plant.

### 10. WATSON-DAFOE AIRPORT-WIMMER-QUILL LAKE-DAPHNE-SPALDING-NAICAM:

Construction of these extensions projected in 1945 were delayed until 1946 because of material shortages. During 1946 the transmission line and distribution system serving the Dafoe Airport were purchased. A considerable amount of the material was salvaged and thirteen miles of line completed from Watson to Dafoe Airport. Construction was under way at the end of 1946 on the line to serve Wimmer, Quill Lake, Daphne, Spalding and Naicam.

11. A portable diesel electric generating unit of 300 H.P. was purchased as a unit to be used in emergency any place on the Commission's system. The unit is presently being used at Wynyard to carry peak loads until such time as a 1,250 H.P. unit, now being installed, can be placed in operation.

Work in progress and construction planned for 1947:

### 1. Estevan:

Work is in progress in connection with an extension of the power plant building and the installation of an 80,000 lb. per hour, 450 lb. pressure, 750 degrees T.T., steam generator. A turbine will be transferred from the Saskatoon plant and this will provide approximately three times the capacity now available from the Estevan plant. A larger turbine will be purchased in the future when sufficient line construction has been completed to transmit the additional energy.

### 2. Saskatoon:

A 15,000 K.W. Parsons turbo generator ordered in 1940, upon which delivery was delayed until 1946, is being installed in the Saskatoon plant. The installation was practically completed on December 31st, 1946, and the unit will be in operation in the first quarter of 1947.

### 3. SWIFT CURRENT:

A 1,250 H.P. McIntosh-Seymour diesel generator unit is being installed in the Swift Current plant. Part of the unit has been delivered and the remainder of the unit will be delivered in the first quarter of 1947. This unit will be in operation in the summer of 1947.

### 4. WYNYARD:

A 1,250 H.P. McIntosh-Seymour diesel electric generator has been purchased and delivery is being made in the first quarter of 1947. This unit will be installed and in operation in the Wynyard plant during the summer of 1947.

### 5. CANORA:

A 450 H.P. Fairbanks-Morse diesel electric generator was purchased in February, 1946 with delivery promised in August, 1946. Due to the failure of the manufacturer to make delivery as scheduled, the unit will probably not be received until May, 1947, and will be installed in the Canora plant just as soon as it is received.

### 6. MEADOW LAKE:

A 450 H.P. Fairbanks-Morse diesel electric generator was purchased in February, 1946, with delivery promised in August, 1946. Due to the failure of the manufacturer to make delivery as scheduled, the unit will probably not be received until May, 1947, and will be installed in the Meadow Lake plant just as soon as it is received.

### 7. UNITY:

A Cooper-Bessemer 500 H.P. natural gas-electric generating unit has been purchased for installation in the Unity plant to burn the cheap natural gas available in the area. Foundations have been completed, engine is to be delivered in January or February and generator is to be delivered by March. This unit will be operating by the summer of 1947.

### 8. RADVILLE-WEYBURN LINE:

Construction of this line is imperative because of the condition of the Radville plant and the desirability of making transmission line extensions rather than adding to an isolated diesel plant. About seventy-five percent of the material is now on hand for this job. Work will be started as soon as weather conditions permit.

#### 9. SWIFT CURRENT-HERBERT:

Construction of this line will enable the Herbert plant to be used only as a stand-by or emergency plant and this will also serve as the first section of the line running to Chaplin to serve the Sodium Sulphate Plant.

#### 10. RADISSON-NORTH BATTLEFORD:

This will interconnect the North Battleford and Saskatoon Power Plants and furnish service to the intermediate area, Contract has been let, material is practically all on the job and the work will start as soon as weather conditions permit.

### 11. CANORA-STURGIS-PREECEVILLE-NORQUAY EXTENSION:

Line hardware and insulators are on hand, but we are still short poles and wire. Work will start as soon as these are received.

### 12. RHEIN-STORNOWAY-CALDER-WROXTON-MACNUTT:

The line to the Rhein Airport was purchased from the Federal Government and the Department of Vetcrans' Affairs contributed two short lines in the Dauphin, Manitoba, area, in consideration of certain Veterans' projects which the Commission constructed. The salvage from these three Airport lines, together with new material to complete the work, will permit this extension with power supplied from Canadian Utilities Limited Plant at Yorkton. We are still short thirty percent. of the poles and approximately fifty percent. of the hardware on this construction job.

### 13. Eston-Milden:

This line will serve Dinsmore, Wiseton, Forgan, Hughton, Elrose, Wartime, Greenan, Plato, Richlea and rural customers in the area. Material for this job was ordered in 1946. About one-third of the wire, seventy-five percent, of the hardware and ten percent, of the poles have been delivered. Work will proceed as rapidly as material arrives.

### 14. Domremy-Wakaw:

This interconnection is to tie together the Prince Albert-Melfort-Tisdale system of the Canadian Utilities Limited with the Saskatoon-North Battleford-Humboldt system of the Power Commission. About twenty-five percent, of the material for this line is on hand at the present time and construction will be held up until poles and wire are received.

### 15. NORTH BATTLEFORD-LASHBURN:

Material for this line was ordered in 1946, but up to the present time only about twenty-five percent. of the wire, fifty percent. of the hardware and ten percent of the poles have been received. Delivery dates will determine the construction date for the line.

#### 16. SASKATOON AREA;

A 3-year construction program involving underground, as well as overhead structures from the Saskatoon power plant to sub-station outside the City limits, is in progress. The 1947 portion of this construction is being delayed at the present time on account of line hardware and pole shortages. All of these jobs were on the 1946 program with the exception of the Radville-Weyburn job which has been added recently.

The following projects will be proceeded with as far as the supply of materials received during the year will permit. All of the work covered by the following Work Orders is essential and will be proceeded with as rapidly as supplies are received.

In addition to the above there will be a number of services to run, an audition to the above there will be a number of services to run, transformers to set and small line extensions to make on present distribution and transmission systems. Approximately 3,000 of these were completed in 1946 and if materials are received in sufficient quantities it may be possible to reach 5,000 new connections in 1947. The number of new services connected in 1946 was greater than the total number of services connected in the ten-year period 1931 to 1941.

### NEW SERVICES ON EXISTING LINES

3,387 new services were constructed and connected to The Saskatchewan Power Commission and Dominion Electric Power Limited systems during 1946 and as stated above, this number is greater than the total number connected during the ten-year period 1931 to 1941. Several thousand more applications for service were received, but construction could not be completed because of the shortage of building materials.

### COMPARATIVE STATISTICS:

The Saskatchewan Power Commission, on December 31, 1944,

1,626 miles of transmission lines

146 towns and villages serving

with 12,989 services (including rural services).

The Saskatchewan Power Commission, together with its subsidiary, The Dominion Electric Power Limited, on December 31, 1945,

2,486 miles of transmission lines 234 towns and villages owned

serving

24,627 services (including rural services). with

The Saskatchewan Power Commission, together with its subsidiary, The Dominion Electric Power Limited, on December 31, 1946, owned 2,651 miles of transmission lines serving 259 towns and villages

28,014 services (including rural services). with

### ELECTRICAL INSPECTION AND LICENSING ACT

The above Act provides for regulation of practices in connection with electric wiring and the installation of electrical appliances. During the year 1946 the revenues of this Department exceeded the expenditures. This is the first year in the history of the operation of this Department in which there has not been an operating loss.

	1944	1945	1946
Inspections made	19,041	23,766	29,826

Loss for year	8,485.73	4,428.68	
Surplus for year			8,146.84

### COLLECTIVE BARGAINING AGREEMENTS

A revision was negotiated on the Collective Bargaining Agreements between the Commission and the Power Commission Branch of the Saskatchewan Civil Service Association and the Dominion Electric Power Limited and the Estevan Electrical Utilities Employees' Union. The revisions were effective from April 1, 1946, and included wage rates at the highest levels in the history of the Commission and the Dominion Electric Power Limited.

The Commission has made some progress in its negotiations with the Highways and Telephones Departments and we believe the foundation has been laid for greater co-operation in the future.

The Commission is indebted to its employees, including supervisory staff, for an excellent showing in 1946. The fullest co-operation was given by all employees and although the staff is widely scattered over the Province and works under varying conditions and often under severe handicaps due to lightning storms in summer and snow and blocked roads in winter, differences regarding interpretation of the Agreements were negligible.

The consolidation of the Dominion Electric Power Limited with The Saskatchewan Power Commission will improve operating conditions in 1947 and further interconnections will reduce operating costs, improve scrvice, and contribute to future development of electrical service in the province.

Respectully submitted,

H. F. BERRY, Chairman.

### CERTIFICATE OF THE AUDITOR OF UTILITIES

REGINA, Saskatchewan,

January 30th, 1947.

In accordance with the Treasury Board regulations, an audit of the accounts of The Saskatchewan Power Commission has been made under my direction for the year ended December 31st, 1946. All the information and explanations required by me have been obtained.

Cash on hand has been verified by inspection and bank balances by certificates from the depositaries. Sinking Fund Investments held by the Trustees and Investments held in Administration Account have been verified by certificates from the depositary, the Royal Bank, Regina. Investments held in City Sinking Funds, in which the Commission has an interest, have been verified from statements furnished by the Cities concerned.

The Common Stock of The Dominion Electric Power Limited with a par value of \$700,000.00 held by the Commission has been verified by inspection. The stock is registered in the name of "His Majesty the King in right of the Province of Saskatchewan, herein represented and acting by The Saskatchewan Power Commission". The amount shown as earnings from The Dominion Electric Power Limited represents dividends received during the year.

Full provision has been made for interest on capital advances, debentures assumed, and other obligations of the Commission as well as for depreciation and replacement reserves for the current year.

An examination was made during the year of the Stores Control records, and tests made of plant and field stores. The year-end inventories have been verified by certificates from responsible officials.

I certify that in my opinion, the attached Balance Sheet and Operating Statements are properly drawn up so as to show respectively the true financial position of The Saskatchewan Power Commission as at December 31st, 1946, and the results of operations for the year ended that date, according to the best of my information and the explanations given to me and as shown by the brooks.

C. H. SMITH, C.A.,

Auditor of Utilities.
